

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (original) Material for producing a conductive organic functional layer based on PEDOT-PSS, wherein the conductivity is optimized by replacing the solvent, i.e. by substitution of a first solvent by a second solvent.
2. (original) Material according to Claim 1, wherein the first solvent is water or some other strongly polar solvent.
3. (currently amended) Material according to ~~one of Claims 1 or 2~~ claim 1, wherein the second solvent is a glycol-containing compound such as ethylene glycol or some other alcohol, in particular also mixtures of a plurality of alcohols, and/or alcohols with a carbon content of C4 to C10, branched and unbranched, also multivalent alcohols, or mixtures thereof, as well as mixtures with water, most preferably glycol and glycerol.
4. (currently amended) Use of a material according to ~~one of the preceding Claims~~ claim 1 for producing an electrode and/or an electrical lead.
5. (original) Use according to Claim 4, wherein the material is applied by processing methods such as spin-coating, printing methods such silk screening, inkjet printing, offset, pad printing, flexo print or squeegee methods.

6. (currently amended) Use according to ~~one of Claims 4 or 5~~  
claim 4, wherein the material is applied in a structured  
manner by a printing process.
